The best products are based on user experiences

JAHTI JAKT

WOODLANDER™ north sky NORTH ICE Angler OTSO

The Finnish Erätukku has served its international customers for over 10 years. High-quality brands, affordable prices and excellent user experiences have made Erätukku one of the most distinguished apparel and equipment suppliers in Finland. Erätukku's products have met with similar success in other European countries, too. Hunters and outdoor enthusiasts all over Europe truly appreciate JahtiJakt products.

Users contribute to our product development from the outset

Development of new Erätukku products is always based on user needs. Our development and testing team includes a large number of hunters and outdoor enthusiasts who give us instant feedback on the functionality of various products in field conditions.

Superior design and product development

Erätukku's designers are continually creating solutions that increase the pleasure of outdoor activities. Once we know what we need, we'll design the product and find the best possible materials from around the world without compromising quality.

Laboratory and field tests

Before our new products reach the market, they undergo strict functionality tests in specialised test laboratories. We also carry out field tests in actual use environments and real hunting situations: in rain, wind, mud and snow – in tough conditions where users demand durability and functionality from their apparel and equipment.

Manufactured in our own contract factories

All products that pass our development and testing stage are manufactured in Erätukku's own contract factories that focus on advanced technical clothing. Continuous quality control is central at every stage of the manufacturing process. Thanks to our own contract facilities, production is flexible and enables competitive pricing.

Extremely Durable

JahtiJakt Thorn raises the standard for durability to a whole new level

JahtiJakt Thorn Jacket and Pants

When it comes to technical properties, Thorn is at the absolute highest level in hunting outfits.

EXTREMELY DURABLE

- Extremely durable Laydura™ fabric
- Reinforcements and multiple seams in high wear areas add to the suit's superior durability.
- The fiber structure makes the Laydura™ material practically non-tearable.

FOR EXTREME CONDITIONS

- The membrane is laminated directly to the shell fabric, making it very lightweight and dry even in rain.
- Special lining in sleeve cuffs, hood, jacket hem and trouser ankles make it easier to move
- High waist of trousers protects the lower back
- Tested in stringent arctic conditions
- Waterproof sleeve pocket with zipper, zippered warming pockets with flaps

TOP CLASS TECHNICAL FUNCTIONALITY

- Completely water and windproof supported by highest level of breathability
- Shell fabric treated with Teflon
- Adjustments on hood, collar, jacket and trousers can be used with one hand
- Mesh covered underarm ventilations with zippers, can be locked open with Velcro straps
- Breast/VHF pocket with water resistant zipper and antenna holder
- Detachable hood that adjusts in two directions, detachable mosquito hood
- Napoleon pockets and inside breast pocket with zipper
- Front pockets with protective flaps and snap fasteners, lined cartridge pockets with cartridge holders
- Hip ventilation with mesh covering and locking zippers
- Roomy mesh pockets inside the jacket at the hem, spacious pocket on rear side of jacket
- Trousers have side pockets with zippers and a rear pocket with zipper and flap

Erätukku challenged our product development team: "Make an outfit that is the absolute best in the market in terms of both durability and functionality".

Our customers choose from the best collection

The research and development work behind every new JahtiJakt outfit is done meticulously with the best available expertise. We use feedback from our wide range of customers on the performance of our products in demanding hunting conditions as we create new solutions.

Our hunting collection is a family of outdoor suits with features that have been refined to perfection for demanding climates and terrain. Choose the JahtiJakt hunting suit that is right for you!

JAHTI JAKT

AIR-TEX makes it waterproof and breathable

AIR-TEX^{2} is a high quality membrane that guarantees great breathability and waterproofing. Water from outside cannot get inside the suit, but the moisture coming from your skin is able to travel through the membrane. You experience maximum comfort in all weather conditions. The AIR-TEX^{2} membrane is laminated directly onto the surface fabric of the suit, which makes it lightweight even in rain. An outdoor suit with an AIR-TEX^{2} membrane is also great for hunting on foot.

The AIR-TEX membrane used in JahtiJakt Classic is a modern membrane that is very water and windproof. This membrane provides excellent properties for outfits that are intended for users that hunt from a stand or move leisurely.

ScentTech makes a hunter less detectable

The Scentech technology of JahtiJakt suits prevents the odor that is exiting your body from passing through clothing. The Scentech technology is based on the interaction of microscopic silver particles located in the fabric with sweat from your skin.

JahtiJakt Hunting Boots

JAHTI JAKT AIR-TEX²

This is how you make a first-class hunting boot

100% waterproof

The waterproofing of a JahtiJakt hunting boot is achieved with a multi-layer structure: the surface leather and seams of the boots are treated to be waterproof. It is equal to the waterproofing of a rubber boot. Underneath the surface is a completely waterproof AIR-TEX² membrane, which is further reinforced by a protective layer of fabric.

Great breathability

In spite of its complete waterproofness, the boot is very breathable due to the genuine leather and AIR-TEX² membrane. The waterproofing structure, which is based on the membrane and its protective technical lining fabric, lets the moisture from your foot out and keeps your feet and socks dry.

Proper foot support

The boot and its lacing provide excellent support, and your foot stays in place – which means no chafing or abrasions. The four layer sole structure makes the boot roll and absorb shocks.

Four-layer sturdy sole structure that rolls

1. Energy insole
A shock-absorbing structure at the heel reduces stress on the lower back and makes your steps lighter. Antibacterial treatment. Removable and washable.

2. Insole
The lightly flexible insole made of durable material protects the shoe's membrane and together with it prevents water from entering the shoe.

3. Midsole
The sturdy midsole makes the shoe suitable for hiking on various terrains. The articulated part at the ball of the foot makes the shoe roll and gives it great walking qualities.

4. Outsole
The genuine Vibram® outsole is sturdy and provides amazingly good traction on all surfaces, even on ice and snow.

AIR-TEX²

Triple layer waterproofing technology

1. This boot's surface is genuine leather that has been waterproofed and treated to repel dirt. The seams have been treated to be waterproof.

2. The waterproof and very breathable AIR-TEX² membrane has been heat laminated to the Thinsulate padding, and surrounds your foot like a sock.

3. Breathable and protective fabric layer protects the AIR-TEX² membrane.

JAHTI JAKT

JahtiJakt Premium Boots

JahtiJakt Premium is a very popular high quality hunting boot. Its AIR-TEX² membrane ensures excellent waterproofing. A quality sole structure makes walking comfortable. The Black style is also great for demanding professional use.

AIR-TEX² SCENTECH Vibram

Roebuck Call

Excellent aid for stalking roe deer.

Roebuck Call JJ9223GX01

Black Grouse Call

This is a great call for creating the angry sounds of a displaying male black grouse.

Black Grouse Call JJ9233GX01

Pheasant Call

Imitates the sound of a male pheasant. Works for both male and female pheasants.

Pheasant Call JJ9221GX01

Fox Call (Mole)

Imitates a squealing mole to attract hungry foxes hoping for a treat.

Fox Call (Mole) JJ9224GX01

Fox Call (Rabbit)

The sound of a frightened or wounded rabbit almost irresistibly attracts foxes to an expected meal.

Fox Call (Rabbit) JJ9225GX01

Fox Call (Bird)

The sound of a frightened or wounded bird almost irresistibly attracts foxes looking for food.

Fox Call (Bird) JJ9226GX01

Wood Pigeon Call

This call imitates several bird sounds. Different blowing techniques result in the coo of a pigeon or the bubbling of a black grouse.

Wood Pigeon Call JJ9227GX01

Grey Goose Call

You can make your sound seem truly authentic with this call by listening to geese and practicing their different sounds – honking, tooting and creaking.

Grey Goose Call JJ9228GX01

Hazel Grouse Call

Use the JahtiJakt Hazel Grouse Call by blowing a few breaths evenly with the correct rhythm: two long whistles and a short cry at the end.

Hazel Grouse Call JJ9230GX01

Mallard Call

Traditional mallard call. You can learn the creaking sound of a duck rather easily and their effectiveness in attracting is very good.

Mallard Call JJ9231GX01

Mallard Call

This rubber accordion style mallard call does not require any blowing. It is used by shaking and stretching it at the right rhythm.

Mallard Call JJ9232GX01

Magpie call

Imitates croaking of magpies to lure other magpies. Can also be used to imitate the sound of a jay.

Magpie Call JJ9222GX01

Partridge Call

This call attracts partridges with sound imitations to within shooting distance or close enough to photograph. Can also be used as a whistle to lure mallards and teals.

Partridge Call JJ9229GX01

Crow Call

Exceptionally effective call especially when used with crow decoys.

Crow Call JJ9234X01
